WORD STYLE

WORD STYLE - word processing made simple!

How many times have you carefully typed out a letter, then ended up throwing it in the waste bin? It's so easy to miss out a word, or hit the wrong key, even if you're a trained typist.

WORD STYLE is a simple program that you can learn to use in minutes, yet it will save you hours. Just imagine you're using a typewriter and you won't go far wrong - but of course, WORD STYLE makes your computer far more powerful than any typewriter!

You can print out your letter or document on virtually any printer, whether dot matrix or daisy wheel. But even if you don't have a printer WORD STYLE can help you organise your thoughts before committing them to paper - like an electronic notepad.

SUPERSOFT, who are based in North West London, have been writing programs for micro computers since 1978.
